Make a Yut Nori board
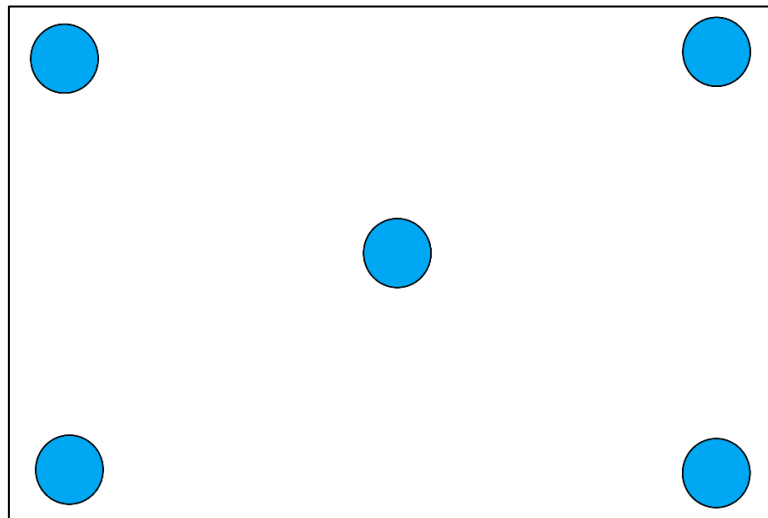

## Make sure the A4 size paper is landscape. This is going to be the board.

1. On one side, draw a 2p sized circle in each of the corners and one in the middle of the paper. Colour all these circles in the same colour.

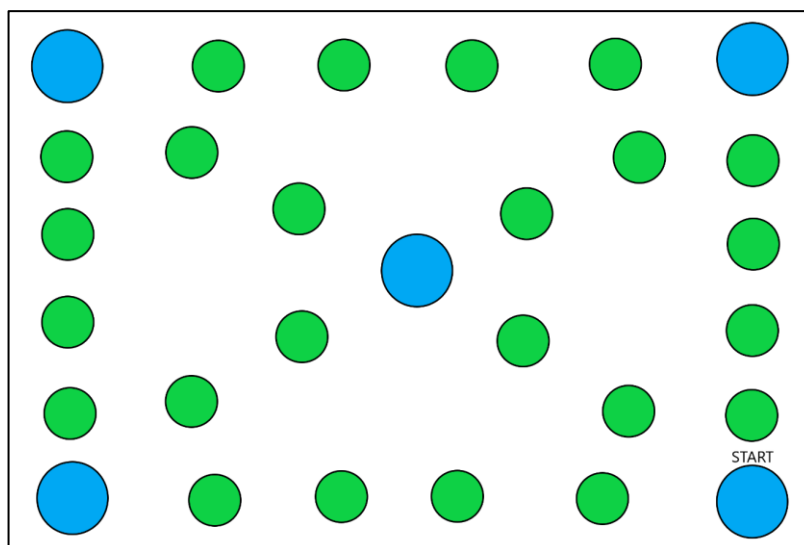

2. Write the word 'START' above the bottom right circle.

3. Draw four smaller circles equally spaced along each edge of the paper, and colour these circles in a different colour to the larger circles. The four circles should join up the outer corner circles.

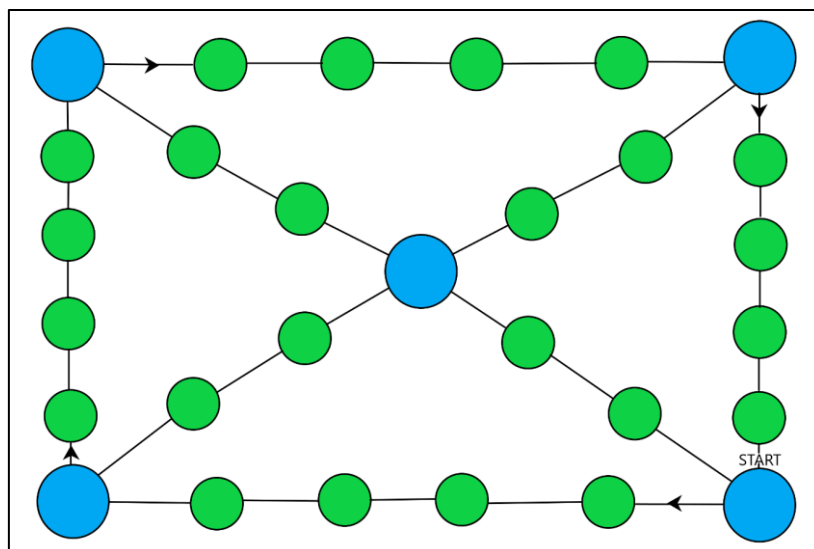

4. Draw a further two circles in the gaps diagonally from each corner circle to the centre circle. Colour these in to match the other small circles. You should now have 5 larger circles and 24 smaller circles in total.

5. Draw a short line between each of your circles on the board.

6. Add to the lines nearest the corner circles to turn them into arrows pointing clockwise around the board.

7. Add to the lines going diagonally to turn them into arrows going downwards, so they are pointing towards the bottom of the paper.
