

How to tie a reef knot

Follow these four simple steps to master this classic knot.

- 1** Cross the black behind the red, then loop it over and under over the red, so the two are intertwined.

- 2** Take the ends that face upwards and pass the left (red) end over and through the black (right) end.

- 3** Hold all four ends and gently pull, until you have this shape.

- 4** Tighten the knot in place.
