

Here is GoFundMe's guide to creating an online campaign

1. Go to www.gofundme.com and click **Start A GoFundMe**. Fill in your Group name and email address to create an account.
2. Once you have an account you're ready to get started! The next page you reach will ask you about your fundraising goal.
3. Think of a title for your fundraiser. You want something short and snappy that grabs people's attention and explains clearly what you're raising money for.
4. Fill in the section **Who are you raising money for?** with your chosen cause or charity. If you know the sort of cause you want to raise money for, but not yet the specific charity, select that you're raising money for 'Myself or someone else'.
5. Add your postcode to show that you're in the UK.
6. Choose your category, so that your fundraising page gets put in the right place on the GoFundMe website.
7. Click to say you're fundraising as a team, and ask an adult to read the terms and conditions with you before accepting them.
8. Add a photo to show what you're raising money for - take a photo of your team to show who you are and what you're doing. Or, even better, you could make a short video to explain the cause you care about and how the money you want to raise would help. See our tips on filming with your smartphone in the fundraising pack.
9. Tell your story. This is where you have more space to describe the issue you want to help solve. Say a bit about who you are, exactly what you're raising funds for, and how the money you want to raise will be used.
10. Now your fundraiser is up and running! Now you can share it with your family and friends. Connect your Facebook to share it with your friends, send emails to your family, and take a photo of your GoFundMe page to share on Instagram or Snapchat.
