

July Transformation Lead Call: Poll overview

18/08/2023

Thank you to all who contributed to the poll in July's call. This information is helping us shape future plans and resources and how we support you better.

In summary:

- 10 Counties/Areas/Regions rated themselves as Green, indicating everything is going to plan
- 28 Counties/Areas/Regions rated themselves as Amber, indicating they were encountering minor issues
- 6 Counties/Areas/Regions rated themselves as Red, indicating they are encountering more challenging issues

Those who rated themselves as Amber in June's call, will have had the opportunity to participate in an additional poll where they were invited to share more information on the challenges they face as a county, and request peer to peer support if needed. Arrangements have been made for those who asked for a Transformation Lead "buddy" and the insight amber-rated counties provided will be reflected in resources and support to be made available in coming months.

If you would like some additional support and are not currently in conversation with the Change team about the resources available to you and your local delivery team, please do get in touch at transformation.leads@scouts.org.uk.
