

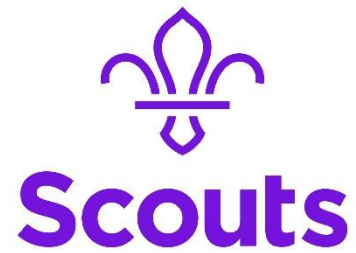

Mapping kindness in your community – kind acts

Kind acts – true or false?

Read out the kind acts the Red Cross might provide one by one, asking young people to stand by the 'True', 'False' or 'Unsure' as to whether they think it is a service they provide. You might like to discuss whether the service is provided in their community, around the world or other charities that provide that service.

- a) Borrowing a wheelchair after a young person has broken a leg (True – this is our Mobility Aids service)
- b) Teaching First Aid to people in the community, so they can be prepared to help others in an emergency (True – this is our First Aid Education service)
- c) Clearing up litter at a local nature reserve (False – this might be organised by a local wildlife trust)
- d) Providing computer skill training for homeless people (False – there are various charities such as Crisis who support people who are homeless and campaign to end homelessness)
- e) Helping people to who are lonely to connect with the community and make new friends (True this is our Community Connector service)
- f) Campaigning for disability awareness? (False – there are various charities which do this, for example the National Autistic Society who campaigns for autistic people and their families)
- g) Helping an elderly person who has come home from hospital by doing some shopping for them (True – this is our Support at Home service)
- h) Setting up a community hall to help people who have left their home following a flood? (True this is our Emergency Response service)
- i) Helping wildlife by protecting the habitats they depend on? (False – various charities including WWF support this)
- j) Providing advice on mental health issues (False – various charities including Mind support people with this)
- k) Helping refugees adjust to life in the UK (True – this is our Refugee Support service; various charities including the Red Cross and Save the Children support Refugees and displaced people around the world)
