

Tour with Dora

Help Gilwell Park's resident cat Dora put her friends on the right path.

Some of Dora's human friends thought they'd have a go at photography, but unfortunately the results weren't very good. Decide what's wrong with the photographs below.

The White House

- (a) The focus of the photograph is on the wrong thing
- (b) The shutter speed wasn't fast enough
- (c) The picture is under-exposed

The driveway

- (a) The picture was taken at night time
- (b) The picture is under-exposed
- (c) The picture needs a flash

The Buddhist temple

- (a) The picture is out of focus
- (b) This shutter speed was too slow
- (c) The picture is poorly framed

A bust of our founder, Robert Baden-Powell Baden

- (a) The picture is out of focus
- (b) The picture shouldn't have used a flash
- (c) The picture is over exposed

A picture of Jam Roll

- (a) The shutter speed was too slow
- (b) The lens was out of focus when the photo was taken
- (c) The picture is over exposed

Answers

- 1(a) The focus was on the flowers instead of on the subject of the photograph.
- 2(b) The picture was taken in the day time but because the shutter was so fast, the picture was under-exposed and we can hardly see anything.
- 3(c) One of the most interesting things in the Buddhist temple is the metal statue of Buddha, but we can hardly see it.
- 4(c) The shutter was too slow and the camera let in too much light.
- 5(b) The camera wasn't just focussing on the wrong thing but the entire shot was blurry and out of focus.

Good. Now that's done, we've got one last thing for you. We've got our pictures all mixed up and would like help finding where we took them.

Draw a line connecting each picture to its correct numbered location on the map.
