

Parachute statements

Cut up these statements and match them to the type of canopy.

Round canopy

Ram-air canopy

Original design	More modern design
Round or dome shaped	Rectangular shaped
Vent holes to let air escape	Cells that inflate as air 'rams' into them
Still used by paratroopers	Used more for recreational sports
Little control of direction	More steerable and controllable
Slower decent once vertical	More control of speed
Good for low altitude drops	Can be used at higher altitudes
