

CO-nfused? Diagnose the Clues!

Diagnosis Sheet

This resource is to accompany the activity 'CO-nfused? Diagnose the Clues!' created in partnership with the Gas Distribution Networks.

There are 12 possible diagnoses for the patients, these are:

Allergic Reaction	Anxiety	Hypothermia	Carbon Monoxide Poisoning
Flu	Food Poisoning	Sleep Deprivation	Hypoglycaemia (Low Blood Sugar)
Inner Ear Infection	Migraine	Panic Attack	Heat Exhaustion (Hyperthermia)

- Ask each patient one question at a time.
- You can ask for their symptoms or any background information they may have.
- Can you figure out which patient has which diagnosis and who has the carbon monoxide poisoning?
