

Future Flight Lab Design Template

1. Who it's for, such as passengers, pilots, emergency services?
2. What's its purpose, such as to help pilots and crew, for deliveries, to help scientists or just for fun?
3. How does it work and what features does it have?
4. Does it solve any problems, such as noise, accessibility, speed, helping the environment?
5. Where does it go and how does it get there, such as a runway?

6. Do your design here and add labels explaining the job of the different parts .
